**Free autism workshop for Families in Cowra and Surrounding Areas**

Research suggests that almost one per cent of the entire population of Australia is now being diagnosed with autism spectrum disorder (ASD). The prevalence of this lifelong condition means there is greater awareness across our community than ever before. However, we can still improve our understanding of the challenges autism presents during the school years. These challenges – impacting students' behaviour, social experiences and learning – can be addressed with practical up-to-date, evidence-based strategies like those introduced at Positive Partnerships workshops for parents and family carers.

Registration opens on 14<sup>th</sup> October 2014**Details for the upcoming two day workshop**Dates: 25<sup>th</sup> & 26<sup>th</sup> November 2014
